The NFT Collection

With this first NFT collection of 8,888 exquisite Punk Angels, he combines his signature Butterfly Wings in 3D, with over 380 unique hand-drawn traits.

Freedom and acceptance is what the Punk Angels Movement is all about.

Punk Angels are stored as ERC-721 tokens on the Ethereum blockchain and hosted on IPFS.

The Artist – PunkMeTender

Romain, aka PunkMeTender, was born in the 80s in Paris, France and immigrated to Los Angeles in early 2000.

He was introduced to street art early on by Mr. Brainwash.

The two artists worked together for over fifteen years, making art and street art, traveling the world, holding art shows.

In 2016, it was time for Romain to start his own venture, and PunkMeTender was born.

A few years ago, PunkMeTender created a new kind of mural installation, integrating three-dimensional butterfly shapes as if they were flying—representing connection on a spiritual and physical level.

PunkMeTender is constantly evolving.

His goals are stationed on the moon and his new project is in the digital world: the Metaverse.

His NFT will be directly inspired by his artworks and style.

Throughout the years, PunkMeTender has achieved a high level recognition in the industry.

Currently displayed in 30+ high end galleries across the world his artworks are sought after by international collectors and hospitality brands such as the Miami South beach SLS hotel and Nobu restaurant fetching prices up to \$150,000.

Celebrities such as Khloe Kardashian, Kylie Jenner, Mariah Carey and Dave Navarro are clients of his Art.
